WHAT IS AERO PAKISTAN?

Aero Pakistan is a national-level STEM and education competition where student teams design, build, and race scaled-down gliders, and showcase their work through portfolios, presentations, and marketing. Jointly developed by NUVEX Pvt. Ltd. and the NUST Formula Student Team (NFST), The initiative aims to build Pakistan's STEM ecosystem by promoting engineering, teamwork, innovation, and entrepreneurship among students aged approximately 15-19.

PROJECT ALTAR

Engineering the future of flight

We're a team building the next-generation
glider from the ground up.
From aerodynamics and advanced materials
to hands-on testing and innovation,
ALTAR is designed to soar higher.

TEAM ALTAIR

ALTAIR is a team of 6 passionate individuals building a glider for the future of flight. We are committed to pushing the boundaries of aerodynamics and design while learning through hands-on innovation.

Our mission goes beyond just building a glider — we build to inspire, to create, and to prove what teamwork can achieve.

Through engineering, testing, and dedication, ALTAIR continues to show that innovation can take flight.

OUR PROJECT

We are aiming to engineer a glider which will be able for flight withstanding all the potential forces acting on it. Moreover, our aerofoil choice and wing placement will make sure that the glider lands on the target maximizing our chances of acing the competition.

EVENTS

We are planning to do two social events to maximize our reach and provide a wider range of values to our sponsors.

We will hold a race in Karachi, expecting audience from various age ranges. Moreover, based on our previous such experience we will be able to provide visibility to our collaborating partners and create a fun, memorable gathering for the participants.

We are also planning to hold various podcasts with the industry people related to our field. They will help us narrow down our audience to enthusiast STEM learners. Furthermore, we will display our sponsors' marketing materials as well as honoring the venue sponsor.

Follow us on instagram for further updates!

SPONSOR US!

ALTAIR presents an opportunity to collaborate and support the young talent in Engineering and Aerospace. Following is the Sponsorship Proposal. If you want to collaborate, do let us know and we'll find a way to work things out!

Musaab - CAD

“No
somersalts
intended, I
guess..”

Shanza - CAD

“See you
with a
goated
glider on
my side”

Humna - Project
Manager

“Stand
back, we
got this”

Shamikh -
Aerodynamics

“Nah, I’d
win”

Huriya - Captain

“Changed
the track.
Kept the
vibe.”

Yamaan - Structure
and Manufacturing

“Baggin
that highest
engineering
score fs”
